

Patent Attorney's Docket No. 032004-005

ATES PATENT AND TRADEMARK OFFICE

In re Patent Application of Rainer K. Schmid Group Art Unit: 3728 Application No.: 09/827,933 Confirmation No: 6673 Filed: April 9, 2001 Examiner: Mohandesi, Jila M. For: ENERGY RETURN SOLE FOR **FOOTWEAR**

AMENDMENT

Assistant Commissioner for Patents Washington, D.C. 20231

Sir:

In response to the Office Action mailed May 3, 2002, please amend the aboveidentified application as follows:

In the Specification:

On page 7, replace paragraph 33 with the following new paragraph:

The energy return system 20 is preferably disposed between the outsole 16 and the epper portion 12 and, in the illustrated embodiment of FIG. 1, extends approximately the 00000804 024800 09/03/2002/RCOBB1 entire length of the shoe. The energy return system 20 includes upper and lower sole plates 01 FC:202 22, 24 preferably made of an elastic material which is defined here as a rigid, high tensile

strength material which has a modulus of elasticity of at least 32 x 10⁶ lb/in.². Preferably, the material will also have a light weight property. A suitable material for the plates 22, 24 is a material made of carbon graphite fibers. Graphite has the advantages that it has high tensile strength, a high modulus of elasticity, is light weight, and as discussed below may be easily processed. The graphite plates 22, 24 may comprise a single layer of graphite

fibers but preferably includes a plurality of layers. The upper and lower plates 22, 24 are 07/22/2002 MAHMED1 00000044 09827933
